County School Notes

We are doing our best to fill the vacancies in our schools. A considerable number of positions have been filled and several more will be, within a week. Owing to relatively small salary and location, we are at present without prospects for a few schools. Teachers are anxious about boarding and rooming facilities. This is a problem of the community and not a problem of the teacher. If there is difficulty along this line, some sort of group action should be taken and the importance of a good home for the teacher while in the community should be assured. We are compelled to import teachers and we must not expect a stranger to take more interest in our schools and community than the community will take in the teacher.

Help the school by finding a boarding and rooming place where the standard of living is on a par with that expected of the teacher.

This problem is being solved and probably will be solved in some localities in this county by the teacherage, a suitable cottage built and maintained by the local board of education.

Kent has a summer term enrollment of 1740. This does not mean the teacher preparation and teacher shortage is solved. Most or nearly all of these people are located. Many of them are only temporary ones, and in justice to our schools and school children must not long remain so. To continue most of this large number must be in school again next year whether or not many return, to do so will depend upon the motion by which they are now moved, the treatment they get in the communities into which they go and the success they have in the school room, certainly this sort of condition puts to the test the kind and extent of the supervision now provided by the county.

Reports from boards of education on text-books adoptions are coming in and should be in shortly. Orders should be placed with the publishers as early as possible in order to insure delivery.

LOSE LIVESTOCK FROM
CARELESS POISON USE

The danger of animals becoming poisoned through the careless use of poison material when spraying or baiting for insects, is pointed out by officials of the Ohio Experiment Station, Wooster.

Every year reports are sent in of animals suddenly dying from securing access to paint boxes and poison containers.

Sometimes Paris Green boxes, white lead or arsenate of lead containers are thrown into the trash pile or dump and animals get the poison from these.

Paint boxes, even though thinly coated, are licked by cattle because of the sweetish taste of the lead compounds.

Such boxes should be thoroughly cleaned with gasoline before using for farm paints, it is stated.

Materials most dangerous to live are those because of the lowered standard, namely twelve weeks training, for stock are Paris green, London purple, arsenate of lead, calcium arsenate and any compounds of arsenic or zinc.

The Chautauqua opened at Wadsworth this Thursday and will close next Monday.

LAFAYETTE

Again was it left to the boys and girls of Lafayette to put across the best Childrens Day entertainment that was ever seen at the M. E. church. The committee in charge of the cantata was fortunate in having at its head two such accomplished musicians as Mrs. Paul Warner who had charge of the singing throughout and Mrs. Carl Harrington, who presided at the piano. Every child who had a part showed the excellent training he had received, and the singing voices all through the cantata were a delight to all. The "Drill Girls", many of whom have taken part in such exercises from little girls up, can always be relied upon, and in their beautiful "Rose" drill on Sunday evening, they surpassed anything they have ever rendered in that line. Mrs. E. E. Lowe and Mrs. Leon Wightman deserve special praise in assisting the girls with the drill. Others who contributed to the success of the entertainment, were the committee on paraphernalia—Mrs. Harry Lance, Mrs. Fike, Mrs. Fulton and Mrs. Reed. The Wiley's Light System installed by Irvin Snyder, was a big new feature, and was so arranged as to throw the light on the platform, thus bringing out, in full relief, the beauty of the scenes, and last, but not least, was the earnest cooperation of the parents, the silent partners of the game—all combining to make this Childrens Day Cantata, a thing of beauty and a joy forever. The committee is especially grateful to all who so generously contributed flowers for the occasion.

How They're Made

THE SECRET OF THE
SAVINGS TO YOU

So many people ask us why it is that we can sell Clothcraft Clothes at such moderate prices while other clothes seem so much higher in price.

Our first answer is, "They do not cost us as much." but there is a better reason than that. The fabrics cost practically the same but Clothcraft Clothes, being made in such enormous quantities by scientific methods, cost much less per suit.

THE PEOPLE WHO FAIL

85% of the people over 65 years of age have failed miserably and now are dependent upon others.

Most people would be comfortably well-to-do if they had not stopped saving money. Nearly everyone, at one time or another, begins to save, though relatively few stick to it until they acquire the habit. That failure to stick to one's purpose is the distinguishing trait of people who fail.

It is safe to affirm that systematic saving for twenty years will absolutely preclude the possibility of ever being dependent.

THE LODI STATE BANK will help you increase your savings by adding 4% interest. If you haven't a Savings Account, start one this week, and above all keep it growing.

Don't be one of the people who fail.
